

## Invite Member to Access Domain in Cloudflare

### Steps

1. Login to Cloudflare, go to the Account Home
2. On the top menu bar select Add -> Account member

3. Under Invite members add [webmaster@foxbright.com](mailto:webmaster@foxbright.com)

- in the Scope section. Under the *Type* drop select either “All domains” or “A specific domain”. If “A specific domain” is selected the select the domain from the *Name* drop.

**Scope**

Select the Scope of your permissions

Operator	Type	Name
<input type="text" value="Include"/>	<input type="text" value="A specific domain"/>	<input type="text" value="fxbrt.com"/>

[+ Add more](#)
